

FIX

Excavator attachments and parts

PRODUCT INFORMATION

Plant Trailers (Optional Extras)

File: PDF02.01A November 2010

Plant trailers are an obvious addition to the FIX range of excavator buckets, attachments and spare parts.

As with all products we sell, our aim is to provide high quality products at discounted prices; so we have chosen the PL range from Indespension.

The Indespension PL range is a brand new design constructed on a monocoque chassis for low deck height and improved towing stability. There are four models in the range, providing carrying capacities from 2,190kg to 2,825kg. This PDF describes the optional extras that are available for the PL range.

Fix Part No	02.01.0001	02.01.0002	02.01.0003	02.01.0004
